

Postdoc Opening - NIST

The Ultrafast Nano-Optics Lab within the PML is seeking a postdoctoral researcher. The candidate will assist in design, nanofabrication and/or measurements of integrated nanophotonic and metasurface devices operating in the visible and infrared spectral range for a range of applications. Prior experience in the field of ultrafast and nonlinear optics, metasurfaces, integrated nanophotonics, and/or nanofabrication is a plus.

The candidate will have opportunity to work in a lively and stimulating state-of-the-art scientific environment at the beautiful NIST campus in the Washington DC metro area. More information can be found at:
